# ECO LITE TRAY

Japanese patent No.5507333

## ECO LITE TRAY - super light and yet has high resistance to deformation

ECO LITE TRAY is a new original container with more cost-cutting and also less weight than those existing paper containers, using cardboard for flange where requires strength and thin paper for container body.

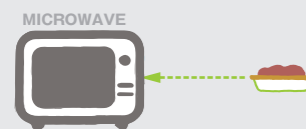

### ECO-FRIENDLY product

We succeeded in decreasing the ratio of using materials compared to the same sized paper plates / trays. This is a next generation of eco-friendly paper container with more efficient use of resources.

#### Microwave friendly

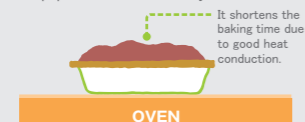

Eco lite tray deli and eco lite tray B series are not only safe for the oven but also for the microwave.

Only products with this mark are microwaveable.

#### Saving utility costs

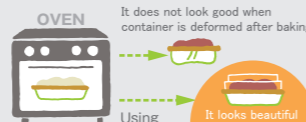

It shortens the baking time and also saves utility costs since ECO LITE TRAY has higher thermal conductivity than the same sized paper plates / trays due to using thin paper for container body.

※The above illustration is an image of oven. Please don't use over direct heat.

#### High resistance to deformation after baking

ECO LITE TRAY has high resistance to deformation after baking due to using cardboard for flange. \*matching lids are also available.

It does not look good when container is deformed after baking. It looks beautiful even after baking due to the high resistance to deformation.

#### Cutting transportation cost and CO<sub>2</sub>

It can cut the transportation cost and also CO<sub>2</sub> since ECO LITE TRAY is much lighter than the same sized paper plates / trays.

### ECO LITE TRAY

ECO LITE TRAY is an unique product only from TEMMA. Works great as plates for bread, sweets, food and for baking. [ Main use Baking, Cake & Food cup ]

# CUBE CUP

The cups are folded for delivery which saves space for storage. Each inner box contains 100 cups and 100 bottom papers.

The cups are one-touch forming design. The bottom paper is to prevent leakage of batter when using them for baking. Both the cup and the bottom paper are greaseproof.

# Ring Cup

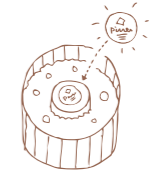

## Ring cup

This new style of cup has been created by putting a tube in the center of our standard PET cup. Use it for donuts, cup cakes or savory breads. Let your creativity loose and produce some fun, eye-catching treats!

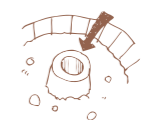

[ Main use Baking, Cake cup ]

### Use the top effectively

Why not attach a sticker of the logo for your shop or the product to the top of the central tube?

### Take advantage of the ring shape

The cup with a hollow tube makes the ring shape look more clearly.

※ Batter may leak through the seam joint of the tube with the cup depends on the viscosity of the batter. Please be sure to order a sample and test it before making your purchase.
