

Bamboo cardboard salad bowls

Made only with renewable and biodegradable raw materials, these salad bowls are elegant and sturdy, combining practicality and sustainability and adapting to today's eco-friendly requirements. Available in four sizes and also with **recyclable PET lids**. These salad bowls are the ideal solution for transporting mixed salads, rice salads and cold dishes.

They are made of material suitable for contact with food without the release of harmful substances such as PFOS and PFOA and without food contamination. Resistant to temperatures between -18°C and 70°C (not suitable for use in traditional or microwave ovens). The salad bowls also hold **Aticelca® certification** with recyclability level A, meaning that up to 90% of the paper in every recycled salad bowl can be reused.
