

WELCOME TO A NEW GENERATION OF FOOD PACKAGING

ecopack 

“ Ecopack is proud to introduce to you the new range of baking molds made of **Cocoa Paper™**.

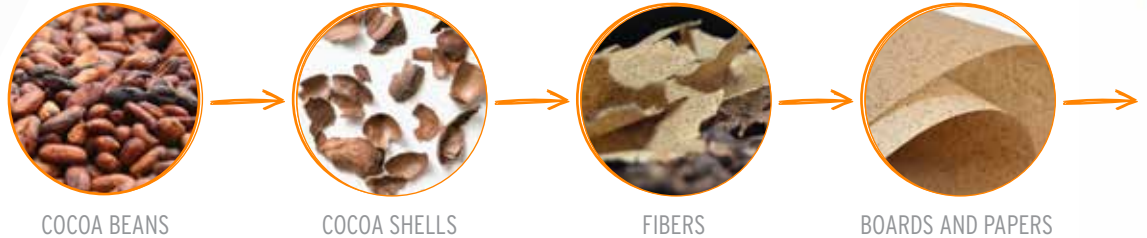

These innovative and sustainable products will enhance your ideas with a very unique packaging.

”

BE THE FIRST!

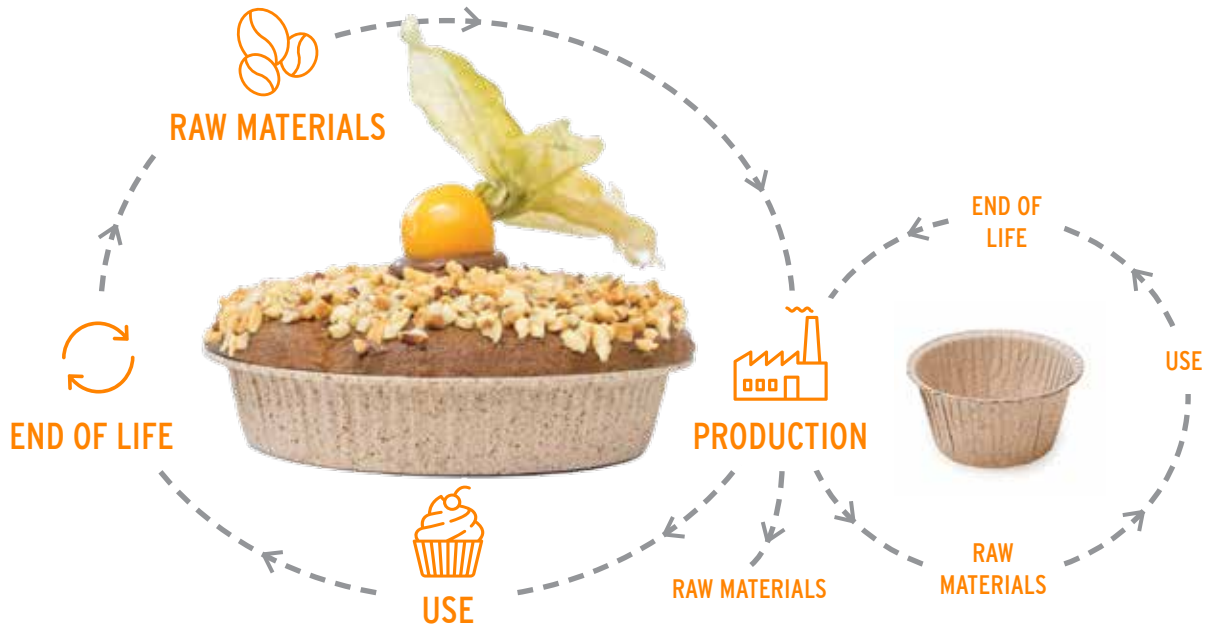

INNOVATIVE PAPER FOR FOOD PACKAGING

Cocoa Paper™ derives from an innovative botanical technology that uses the shells from chocolate industry and transforms them into a paper of superb quality with a natural texture and unique aesthetics.

CIRCULAR ECONOMY

Cocoa Paper™ is a perfect example of the Circular Economy. The cocoa shells from the production of chocolate are used to create compostable paper that breaks down back into the earth after use.

100% COMPOSTABLE*

- ✓ UP TO 40% OF VIRGIN CELLULOSE COMES FROM COCOA SHELLS
- ✓ 0% ADDITIVE INKS

Cocoa paper™ is PFOAs, PFOA, PFOS free and 100% industrially compostable, it can be disposed in the organic waste.

* Tested EN 13432

TRADITIONAL PAPER

Compostable

ECOPACK ACTIONS FOR THE ENVIRONMENT

Responsible raw materials outsourcing

- FSC certified paper (certified suppliers for foodchain production).
 - Biodegradable and compostable papers.
- Our products are provided in boxes & bags:
- recyclable plastic bags
 - recycled cardboard boxes

Circular Economy approach

- Paper derived from alternative cellulose sources, secondary raw material.

Sustainable production

- Resource efficiency: reduction of energy and raw materials consumption through implementation of industry 4.0 automatization.
- Eco-Design: product development is considered from raw material to disposal/end of life.

Paper cups

Code	Description	Size mm	Pieces per pack	Packs per box	Pieces per box	Boxes per pallet	Pieces per pallet
