

Greenearth
Food Packaging Ltd

Greenearth Food Packaging has been leader in the production of baking moulds and containers for the international food industry since 2008.

Company vision

Greenearth Food Packaging was founded back in 2008 and the company has been successfully operating out of the office and warehouses in the UK ever since. We supply our valued customers throughout the UK and Europe, priding ourselves in offering our customers a 'service that is second to none' at the envy of our competitors.

The director has been in the packaging industry since 1977 and therefore has an enormous amount of knowledge of the industry. We are constantly staying alert to any changes within the industry offering tailored solutions for all our customers.

Our BRC certification demonstrates our commitment to the supply of safe and high-quality food packaging, our customers can be assured that we address our due diligence requirements of both suppliers and retailers.

The materials

Paper is a recyclable material because the cellulose it contains can be subject to repeated processing cycles. Greenearth Food Packaging holds FSC® certification for the management of certified papers. The FSC® certifies the responsible management of forests by verifying the origin of the raw material through the chain of custody. FSC® certified products are available to order.

All Greenearth Food Packaging products are made with raw materials (paper, glues, inks) that comply with the international regulations governing suitability for food contact. All the moulds intended for baking can be used in the oven and are certified to resist temperatures of up to 220°C, and are also suitable for use in the microwave.

Other components

All the components used comply with the legal criteria regarding materials, conformity and food safety. Some of the components also comply with the EU directive on biodegradability and compostability UNI EN13432:2002 and meet all legal criteria regarding materials, compliance and food safety. Greenearth Food Packaging products are, therefore, suitable for food contact, and are free from the release of harmful substances and food contamination, in compliance with EU Regulation (EC) 1935/200.

All Greenearth Food Packaging products are made from recyclable, biodegradable paper. They protect the environment and comply fully with the legislation regulating direct contact between packaging and food.

CERTIFICATIONS

We use only the finest quality carefully selected raw materials to make our products.

We hold UNI EN ISO 9001:2015 certification for Quality System management and comply with the version 5 of the BRC global standard for packaging and packing materials. We also adopt the Aticelca recyclability assessment system.

- FSC® multisite certification
- FPA Member
- Sedex Member
- BRC certification
- Aticelca 501:2019
- OK Compost Industrial

Customer care

Customer satisfaction has always been our top priority. Every Greenearth Food Packaging site has a highly professional customer care team prepared to meet the needs of the customer quickly and efficiently.

A chat box has been activated on our website with a dedicated customer care operator, to provide assistance in real time and respond increasingly to the customer's needs.

Yes, we care

Sustainability

We are leader in the design and production of paper containers for food, using its resources to develop the sustainability index of paper as a raw material and progressively reducing the environmental impact along the whole supply chain.

Less raw material

We design machines and moulds to make increasingly lightweight paper products without compromising strength. This means lower consumption of resources (energy, water), fewer chemicals and fewer emissions during transport.

Sustainable product end-of-life

We manufacture products with an environmental impact that is reduced to the minimum (recyclable, biodegradable, compostable).

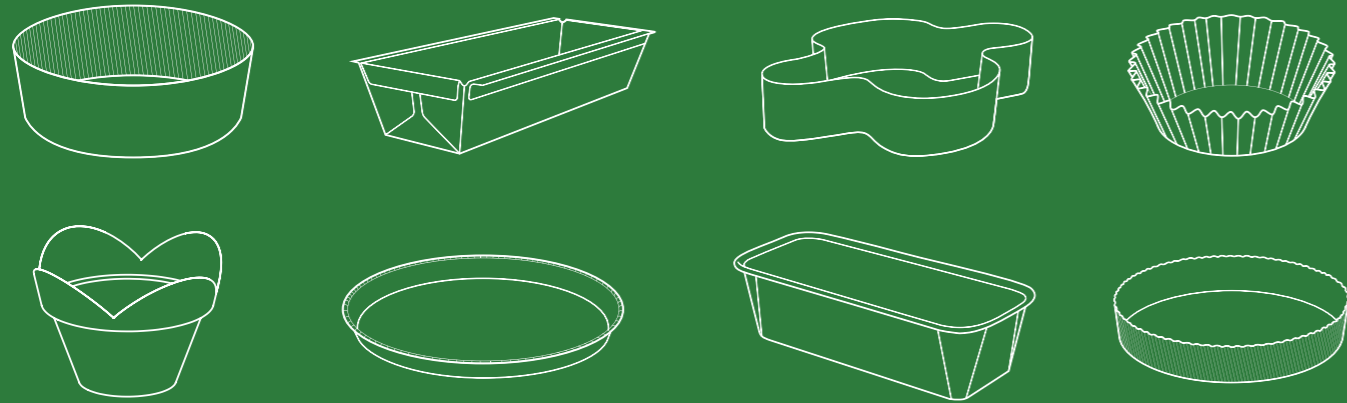

Less waste

The waste of raw materials is minimised thanks to the planning of the supply chain and production cycle engineering. Paper waste is recovered as a secondary raw material.

100% sustainability by 2030

Product range

Our range includes over 800 items, available in various sizes, colours and finishes, also in customised versions.

Colomba

The characteristic mould for the traditional Easter cake, available in four sizes.

The colomba moulds, with their unmistakable shape, are suitable for use on automatic unstacking machines. The vertical band is made of greaseproof non-stick, corrugated paper. The base is made of corrugated micro-perforated paper, ensuring optimum cooking of the dough.

Special moulds

To make the best moments even more special, we have created a range of moulds for every occasion.

Egg, star and 4-leaf clover: unusual shapes to perfectly enhance every creation, be it sweet or savoury. Not just for festivities, but for every occasion.

Plumcake

One of the great classics, the plum cake mould is suitable for a lot of different recipes.

Created as a mould for the typical English cake, the plum cake mould lends itself to countless other recipes. Also available in the silicone coated version, for easier release of the product.

Tulip cups

An explosion of colours to make perfectly shaped muffins and cupcakes.

Cheerful, colourful and fun, tulip cups are the perfect dress for muffins. Made with batch-dyed papers that do not release colour during baking. They are not self-supporting, so they must be positioned in a baking tray before baking. Customisation available on request.

Lotus cups

As elegant and precious as a flower, lotus cups lend themselves to many uses, from muffins to other types of dough.

With pointed or rounded petals, lotus cups not only give shape to classic muffins and cupcakes, but are also suitable for cooking or serving individual savoury portions. Their shape presents the finished product in a very attractive way.

Plumpy

Perfect for baking in the oven, its unique line also makes it ideal for presentation.

Made iconic by their attractive and elegant design, plumpy moulds are sturdy and self-supporting, so they don't need a metal baking tray during baking. Recyclable R-PET lids are also available for all sizes.

Cocoa Paper™
baking moulds:
welcome to a new
generation of
food packaging

Innovative paper

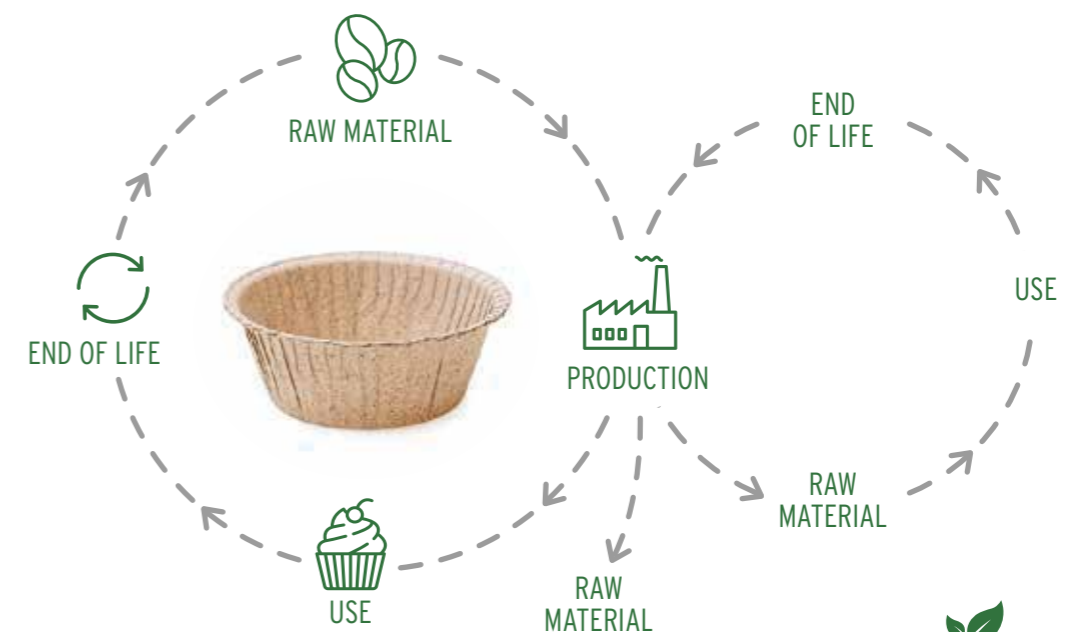

Cocoa Paper™ is the product of an innovative botanical technology that uses the shells resulting from cocoa processing and transforms them into superb quality paper characterised by a natural texture and unique aesthetic.

COCOA PAPER™ CHARACTERISTICS

- ✓ Up to 40% virgin cellulose from cocoa shells
- ✓ 0% added inks
- ✓ Cocoa fibres used for Cocoa Paper™ are certified OK COMPOST HOME by TUV Austria

From sweet to savoury

Ecopack broadens its horizons, creating two lines dedicated to delicatessens and take-away: with **Savoury** and **Delivery** we meet the most varied needs, ranging from containers suitable for baking to perfect solutions for cold dishes, salads and poke bowls.

FLY LIGHTER WITH PAPER PAN

Paper Pan

Eco-friendly tray,
30% lighter and recycable.

Now even more eco-friendly,
made with FSC® paper

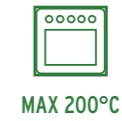

Aticelca® 11364-0003

Paper Pan has the same characteristics as plastic trays, such as resistance to grease and liquids, rigidity and heat-sealability, with the added advantage of being 30% lighter than ordinary cardboard containers and therefore eco-sustainable. It is recyclable with paper in compliance with UNI11743:2119, UNI EN 13430. Paper Pan holds Aticelca® 501 B, certification, meaning that 80% of the paper used for every Paper Pan can be reused.

Bamboo cardboard salad bowls

Made only with renewable and biodegradable raw materials, these salad bowls are elegant and sturdy, combining practicality and sustainability and adapting to today's eco-friendly requirements. Available in four sizes and also with recyclable PET lids. These salad bowls are the ideal solution for transporting mixed salads, rice salads and cold dishes.

They are made of material suitable for contact with food without the release of harmful substances such as PFOS and PFOA and without food contamination. Resistant to temperatures between -18°C and 70°C (not suitable for use in traditional or microwave ovens). The salad bowls also hold Aticelca® certification with recyclability level A, meaning that up to 90% of the paper in every recycled salad bowl can be reused.
